## FEND WEB DEVELOPER

### WORK EXPERIENCE

#### APP SOFTWARE DEVELOPER

*SKF Lubrication Managment Germany | Berlin | 01.2022 - Present*

- Frontend Development: Worked on one project from beginning till now, our tech stack is utilising: AWS, Next.js, Typescript, Storybook, Jest combined with react testing library, SWR (Data fetching), internal component library combined with ant design and a lot of other micro components when needed.
- UI Design: I was the only UI Designer within the team. I was the one responsible for the initial draft of our current project and the one who maintained Figma files and adjusted components as needed within the design tool.
- UX Design: Worked a lot with UX together with a senior UX, in which I created a lot of Figma prototypes and was taking notes during usability tests.
- Concept ideation: As designer I would many times bring forth different ideas to management and receive feedback on how to proceed. I am a trully team oriented person and I like to help and be helped when needed.

### CAREER OBJECTIVE

I have expanded my knowledge with 2 years of experience in FEND, UI and UX. I would love to keep learning more technologies and become a master in FEND while being able to start learning BEND on the way, therefore becoming a FullStack Developer in the hopefully near future. My long term goal is to have been able to develop web but also native applications. I would describe myself as flexible in roles and team oriented.
